# PERM STATE UNIVERSITY

Perm State University is one of Russia's leading classical universities, combining a rich academic tradition with a modern educational environment.

### Подзаголовок

Over 100 years of academic excellence and recognition

### Подзаголовок

An international community of students from around the world

### Подзаголовок

Modern, practice-oriented academic programs

# Business Analytics

The program prepares specialists who can work with data, understand business processes, and develop effective data-driven solutions. The curriculum is taught in English and focused on real-world business challenges, helping students quickly adapt to market demands.

### The program is fully taught in English

You immerse yourself in an international environment and develop professional English skills for working in global companies.

### Working with real business cases

In classes, you solve real-world business problems: analyzing data, optimizing processes, and proposing solutions.

### Mastering modern analytics tools

You study Python, Excel, BI systems, and statistical methods used in real-world analytics.

### Duration of study — 4 years

A full bachelor's degree program with a strong academic foundation and gradual immersion into the profession.

### High demand for specialists worldwide

Business analysts are in demand across IT, finance, marketing, and other industries.

### Professors are fluent in English

Classes are conducted without language barriers — complex topics are explained clearly and accessibly.

# Student Reviews

Students at Perm State University highlight the high quality of teaching, strong support from the university, and a friendly atmosphere. Many emphasize that the program not only provides knowledge but also helps them confidently build a career in an international environment.
